

Aegis Therapies and You—Making a Difference

At Aegis Therapies, our mission is to improve the lives of the people we serve through compassion and innovation in healthcare. With operations in 37 states and the District of Columbia, more than 6,000 Aegis therapists treat an average caseload of 16,000 patients in more than 1,000 nursing homes and other healthcare organizations.

Aegis Therapies welcomes all persons in need of its services and does not discriminate on the basis of age, disability, race, color, national origin, ancestry, religion, sex, or source of payment. 4679-0906-06 rev 02/09

We serve more than just the patient—we serve each and every therapist and healthcare organization that depends on us to be a leader in rehabilitative care. We promise you the best possible programs and outcomes for your patients—and we keep our promises.

Forward thinking

We have become one of the nation's premier providers of rehabilitative therapy through decades of experience and our innovative programs. We are not a cookie-cutter rehabilitation company—we're dedicated to finding the solutions to each patient's rehabilitation needs. We've developed some of the most effective therapy programs and tools in the industry such as our Geriatric Enhanced Modalities program, the industry-leading Aegis Rehab Outcomes, and Freedom Through Functionality—our exclusive Nautilus® strength-training program. We collaborate with customers, patients and fellow therapists every day to ensure that our programs achieve the best possible results for those who depend on us.

In addition, Aegis Therapies has consistently led the way in replacing manual processes with more efficient technologies. Our interactive training program and web-based documentation tools provide therapists with more hands-on treatment time. Our computer billing interface system speeds billing processes.

Shared mission

Collaboration is at the heart of our work, and our nationwide network of therapists, master clinicians, clinical specialists and others feel the rewards of sharing their insights with the facility, the patient and each other. We believe that working together, we can achieve the goal of providing patients with the best possible care in order to achieve the best possible results.

Applying our programs and technologies to your rehabilitation services is a great way to enhance your therapy outcomes. We've been there, we've proven it—now let us share our experience with you.
